El Paso Water – Planning and Development

EPWU does not object to this request.

Water:

There is an existing 6-inch diameter water main extending along Polaris Dr. located approximately 5 feet east of the right of way centerline. This main is available for service.

Previous water pressure tests from fire hydrant # 2976 located at the northeast intersection of Polaris Dr. and Hubble Dr. have yielded a static pressure of 50 (psi) pounds per square inch, a residual pressure of 48 (psi) pounds per square inch, and a discharge of 581 (gpm) gallons per minute.

EPWU records indicate a 3/4-inch water meter serving the subject property. The service address for this meter is 8601 Polaris Dr. This service can be used to serve lot 1.

Sanitary Sewer:

There is an existing 8-inch diameter sanitary sewer main extending along Polaris Dr. located approximately 5 feet west of the right-of-way centerline. This main is available for service.

General:

Each lot requires individual water and sanitary sewer connections within the limits of each lot.

EPWU requires a new service application to provide service to the property. New service applications are available at 1154 Hawkins, 3rd floor and should be made 6 to 8 weeks in advance of construction to ensure water for construction work. A site plan, utility plan, grading and drainage plans, landscaping plan, the legal description of the property and a certificate-of-compliance are required at the time of application. Service will be provided in accordance with the current EPWU – PSB Rules and Regulations. The applicant is responsible for the costs of any necessary on-site and off-site extensions, relocations or adjustments of water and sanitary sewer lines and appurtenances.
